

# Setting **BRAVECTO**<sup>®</sup> calendar reminders on your iPhone

Smart choice. Smart ways to remember.

Most dogs love the taste of pork liver-flavoured **BRAVECTO**<sup>®</sup> chews, and consider them a treat (albeit a rare one!) that they look forward to receiving every 12 weeks.

Make sure you remember to administer your dog's treatment on schedule by setting a 12-week "time-for-**BRAVECTO**<sup>®</sup>" recurring event in your iPhone calendar. Just follow the directions below.

## HOW TO SCHEDULE A 12-WEEK RECURRING EVENT IN YOUR IPHONE'S CALENDAR APP

1. **Open Siri** by pressing and holding your iPhone's Home button (the main button at the bottom of the screen).
2. **Tell Siri:** "Put a reminder in my calendar to give flea and tick medication."
3. **Siri will ask you:** "When is your appointment?" – to which you will reply: "Tomorrow (or whenever you want), and recurring every 12 weeks."  
NOTE: It is very important to include the part about the event recurring every 12 weeks!
4. **Siri will say:** "OK, I set up your appointment starting tomorrow. Shall I schedule it?"  
NOTE: The screen asking you to confirm the appointment will show only the first occurrence of the event at this time. Go ahead and tap on "Confirm." You'll then be shown a screen on which your event is described as recurring.
5. **To check your recurring event,** go to your Calendar app and tap on the first date of the event. Your event should appear on that day's agenda.
6. **By tapping on the event** you'll see that it is scheduled to be repeated every 12 weeks.

That screen also allows you to schedule alerts to notify you ahead of the event. That feature could be helpful, especially if you need to go to your veterinary clinic to pick up more **BRAVECTO**<sup>®</sup>.

***That's it – you're all set to remember!***

# Setting **BRAVECTO**<sup>®</sup> reminders on your iPhone

Smart choice. Smart ways to remember.

Most dogs love the taste of pork liver-flavoured **BRAVECTO**<sup>®</sup> chews, and consider them a treat (albeit a rare one!) that they look forward to receiving every 12 weeks.

Make sure you remember to administer your dog's treatment on schedule by setting a 12-week "time-for-**BRAVECTO**<sup>®</sup>" repeating reminder on your iPhone. Just follow the directions below.

## HOW TO SET A 12-WEEK REPEATING REMINDER IN YOUR IPHONE'S REMINDERS APP

1. **Open Siri** by pressing and holding your iPhone's Home button (the main button at the bottom of the screen).
2. **Tell Siri:** "Remind me to give flea and tick medication every 12 weeks, starting tomorrow." (Or whatever date you plan on giving your dog his or her first dose of **BRAVECTO**<sup>®</sup>.)  
NOTE: Using these exact words and speaking clearly and slowly seems to work well with Siri.
3. **Siri will repeat your request** and ask you to confirm. Press "Confirm."  
NOTE: The 12-week repeat will appear as "Custom Repeat" on the screen, which is perfectly fine. (You'll be able to confirm it's OK later.)
4. **To check your reminder**, go to the Reminders app and tap on "Give flea and tick medication...", and then on the small "i" symbol next to it, to see the details of your reminder.

Notice the reminder is scheduled to be repeated "**Every 12 weeks**" – success!

*Pat yourself on the back... and enjoy the peace of mind that comes from knowing your dog is protected against fleas and ticks for 12 weeks!*
