

Pembroke Animal Hospital's

MISSION "SLIM-POSSIBLE"

We understand the difficulty pet owners face when trying to diet their pet. We here at Pembroke Animal Hospital have developed a program to assist you in accomplishing your pet's weight loss goals.

With this program we will guide you to achieve a safe and effective weight loss for your pet. We will work together to comprehensively review your pet's current lifestyle and diet and then formulate a plan for successful weight loss.

By enrolling in this program you can expect an extended face to face meeting with our certified weight coach where every aspect of your pet's dietary intake and activity level will be assessed. Each patient receives specifically tailored recommendations based on their individual lifestyle. Follow up appointments and ongoing phone consultations will be conducted by the weight coach to address any concerns, problems as well as offering consistent support and encouragement.

Rewards will be given in celebration and recognition of reaching both short and long term goals. We look forward to this opportunity to help your pet lose excess weight and gain long term health benefits.
